PROJECTS

Collab Lab: Eggheadded

2020

Eggheadded is a smart shopping list that learns your buying habits and helps you remember when you need to make your next purchase.

- Delivered a fully functional app within the 8-week time frame by using agile methodologies and solving problems in a pair programming setting.
- Streamlined user experience by creating a simple item detail modal.
- Created a filter allowing users to easily search through their shopping list.

Tech Stack: React | Firebase | Bootstrap | Netlify

Sauti Databank

2019

Sauti East Africa is a non-profit organization that encourages individuals to trade legally, safely, and profitably. Our mission is to empower cross-border traders to exercise their rights as citizens.

- Reformatted the Sauti Databank database with a remote 5-member team to create a more dynamic approach, intended to increase the platform's ease of use and end-user functionalities for partners and consumers.
- Displayed data in a visually pleasing manor by implementing the use of Nivo React component charts.

Tech Stack: Node | Knex | Express | MySQL | Rest API | React | Nivo| SASS

EXPERIENCE
